

International Metaphysical Academy

For Universal Knowledge

What is “Metaphysics”?

Metaphysics is the study of mind, energy and matter, unexplainable phenomena that often are invisible to the human eye, universal laws and principles, intelligence, spirituality, consciousness, our existence and the purpose of all life.

What is the “International Metaphysical Academy”?

We are a fast-growing, **non-denominational** and **non-political Metaphysical Academy** offering cutting-edge metaphysical education and universal knowledge world-wide.

We offer metaphysical instructor certification, mentoring, counselling and coaching services for individuals and groups, customized workshops, keynotes and private study opportunities. We also provide education for parents and teachers who work with specially gifted children, such as Indigo and Crystal Children. We also work with Indigos and Crystals themselves.

The *International Metaphysical Academy* originated in 1995 in Victoria, BC, and is the *North American Division of the “Internationale Metaphysische Akademie – Medium Manuela”*, headquartered in Laxenburg, Austria.

What are our goals?

Our goals are to support, educate and facilitate the personal and spiritual advancement of all individuals who sincerely seek knowledge, inner contentment and meaning. We encourage individual thinking and accountability and we assist people in applying the acquired knowledge to real life issues. One of our key goals is to strengthen one's ability to discern between spiritual hype and information that is of real value. Our work is not based on fortune-telling, sensationalism, exploitation or currently popular, superficial spirit entertainment. It is grounded in universal knowledge with hands-on application to everyday challenges.

How do we accomplish this goal?

Through public lectures, seminars, individual spiritual coaching and a practical step-by-step Metaphysical Academy program which gives insight into much-needed knowledge of the understanding of life, our role on this planet and in the Universe at large. We share and compare spiritual information from a wide range of sources, inviting and including many well-known, credible metaphysical scholars, philosophers and scientists. We also reference spiritual information from the Beyond provided by the entity "Theobald", a Universal God Teacher, channelled through his exclusive Medium Manuela.

How are we different from others?

Our International Metaphysical Academy provides a safe, supportive environment without dogma, doctrine or rituals. Study texts include everything from ancient scriptures, current publications and scientific reports to medially transmitted information. It does not represent a religion, cult or sect of any kind but offers quality education, teaching, self-evaluation and self-development.

The Metaphysical Academy supports and guides anyone who is genuinely searching for truth. It is committed to ethical principles and based on the belief in one God, one overall spiritual power or intelligence.

Activity with the Metaphysical Academy does not prevent participants from their personal involvement with their Church or any other religious or spiritual practice.

"Nothing is as powerful as a closed mind..."

Theobald:

"The future is the science about the Universe. God's teachings are not religious. They are meant to be used for the future of man. This future is spiritual and its leadership comes from God and his helpers. In today's times it has become necessary to lead the people of tomorrow through correct teachings into the Spiritual World so that eternal life will be open to all."
