## Cosmic Intelligence and the Hermeneutic Philosophy

By Anneli Driessen Ph.D., Ph.D., MCC – April 27, 2021

Although often placed into the category of the esoteric and occult, people like Albert Einstein (“everything is energy”) and many other progressive scientists and unconventional thinkers recognize the fundamental factual truths of Hermes Trismegistus’ seven universal laws, simplified and summarized below:

1. Mentalism
2. Correspondence
3. Vibration
4. Polarity
5. Rhythm
6. Cause and Effect
7. Male and Female

These Universal Truths, along with many other unerring universal laws and principles, are extensively covered in the Academy’s curriculum, teaching each of us how to live our life purposefully while navigating through the inevitable crises with which we are challenged. consequence of an accumulation of thoughts or actions. This includes the tragedies resulting from our obsession with fake news and the manipulation and destabilization of the world's economies, which result from the blind acceptance of 'facts' and 'ideologies' and we intuitively know to be false. Ultimately, these are all consequences of our generalized resistance to recognizing, accepting, and acting upon our intuitive wisdom.

Only when we wisely choose to allow undesirable consequences to serve as '*wake-up calls*', can we begin to make better choices, ones that are honourable and lead us into alignment with all of creation, along with its creator, God.
